## **Where has the world come**

### **Verse 1**

Every night I keep hearing  
News on the tv of people tearing  
Shootings, terror, bombs and lives lost  
Another tragic line's been crossed

Then we hear about the politicians  
Right and left, just like magicians  
Doesn't matter what side you support  
They all have an angle to distort

### **Chorus 1**

Where has the world come  
Don't recognize it anymore  
Where has the world come  
Every day seems like a chore

Wish things could be the way they used to  
Simple and kind and always true  
Wish things could be the way they used to  
With hope and love for me and you

### **Verse 2**

There is so much pain out there  
Lots of distrust and despair  
People searching for someone to help  
For all their problems to just melt

We have all had enough, had enough, of these tough times  
I may need a bottle or two and a few limes

### **Chorus 2**

Where has the world come  
Don't recognize it anymore  
Where has the world come  
Every day seems like a chore

Wish things could be the way they used to  
Simple and kind and always true  
Wish things could be the way they used to  
With hope and love for me and you

## **Bridge**

What do we do from here?  
Got only one choice  
Shape your destiny,  
show them your voice

Tell them how you feel,  
it's a really big deal

You can make a change  
for years to come  
This is the best way,  
Let's beat our drum

The future's in our hands  
Let's all join together,  
From every part of this great land

## **Chorus 3**

Where has the world come  
Going to help make it better  
Where has the world come  
Let's change it together forever

Wish things could be the way they used to  
Simple and kind and always true  
Wish things could be the way they used to  
With hope and love for me and you

## **Outro**

The future's in our hands  
Let's all join together,  
From every part of this great land
